Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 March 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 7-9 is/are pending in the application.

DETAILED ACTION

Receipt and entry of Applicant's Preliminary Amendment filed on Mar. 25, 2009 is acknowledged.

Claims 1 and 7 have been amended. Claims 2-6 have been canceled. Claims 1 and 7-9 are pending in this application.

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Czech Republic on April 1, 2003. It is noted, however, that applicant has not filed a certified copy of the PV 2003-926 application as required by 35 U.S.C. 119(b).

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "*pivots, lugs*" recited in claim 7, "*a conducting eccentric*" recited in claim 8, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the

renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "2" has been used to designate both "cylinder" (see para. [0009], line 5) and "piston" (see para. [0008], line 1); reference character "1" has been used to designate both "casing" (see para. [0007], line 2) and "covering" (see para. [0008], line 2). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: ("one of the casings" recited in claim 7; "a conducting eccentric" recited in claim 8).

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1 and 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Regarding claims 1 and 7, the use of alternative expression “one conducting ring embedded on or in the sidewall...or in a sliding way ...either in a sliding way.... or a rotary way...the supporting shaft” recited in claim 1; “at least one of the casings, or slots on the other side” recited in claim 7 renders the claims indefinite because the alternative choices are non-equivalent.

- Claim 7 is recites the limitation "at least one of the casings" in line 3. There is insufficient antecedent basis for this limitation in the claim.

- The claims not specifically mentioned are indefinite since they depended from claims 1 and 8.

Claim Objections

7. Claims 1 and 7-9 are objected to, in that their subject matter needs to be incorporated into the specification and the drawings. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1, as best understood, and as far as definite, is rejected under 35 U.S.C. 102(b) as being anticipated by Putz (Patent Number 4,008,988).

Regarding claim 1, as shown in Figs. 12-13, Putz discloses a machine with a rotating piston, enclosing workspaces with alternately changing volumes where the piston (R'') is embedded inside a cylinder 14 formed by at least one sidewall 81, 84 and by a curved covering, partly in a rotating way around two parallel axes of rotation, which are normal to the cylinder sides sidewall 81, 84 and partly in a sliding way in two directions normal to one another and also parallel to the axes of rotation, characterized by at least, by one conducting ring 80 embedded on a sliding way against a supporting shaft CS'' normal to its revolving axis, which is connected in a sliding way, to the piston (R'''), which is embedded on the supporting shaft CS''' in a rotary way through a supporting eccentric 90 connected to the supporting shaft.

Allowable Subject Matter

9. Claims 7-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Prior Art

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of four patents: Campo (U.S. Patent Number 1,310,157), Buske (U.S. Patent Number 3,276,676), Georgiev (Patent Number 4,300,874), and Uebel (Patent Number 5,295,814), each further discloses a state of the art.

Conclusion

11. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP §2163.06 II(A), MPEP §2163.06 and MPEP §714.02. The "disclosure" includes the claims, the specification and the drawings.

Communication

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868. The examiner can normally be reached on Monday-Friday 8:30am- 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
